

MOBILE LOGISTICS

for **SAP Business One**

EASY TO USE MOBILE LOGISTICS SOLUTION FOR SAP BUSINESS ONE

 Regardless if your warehouse is equipped with ordinary items, serialized or batch managed items, Mobile Logistics adapts automatically and intuitively. You can process different units of measurements, inbound and outbound. With your own queries and permissions you customize Mobile Logistics to your needs in no time and without external help. Enter a world full of transparency, efficiency and joy.

 An entry-level product for managing SAP Business One logistic processes through a mobile device. Compatible with Android, iOS, and most common industry scanners. Mobile Logistics simplifies your SAP Business One logistics workflows. **Easy to install, configure, and ready to use in less than one business day.**

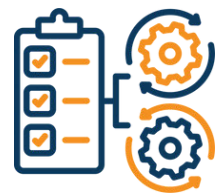

EFFICIENCY

By pushing pick-orders in real-time to your logistics team, you increase your performance significantly. Automate document printing, inventory counts, or labelling of goods received.

ADAPTABLE

Customize your mobile logistics experience by changing logos, colours, lists or fields and adapt the app to customer specific needs.

STANDARD

All SAP Business One features are covered in Mobile Logistics. If you use bin locations, serial numbers, batches or units of measures, it is available. Also the industry standard of GS1 barcodes is part of Mobile Logistics.

THE ADAPTABLE, SCALABLE OUT-OF-THE-BOX WAREHOUSE MANAGEMENT SOLUTION FOR SAP BUSINESS ONE.
